BIG

The Next Generation
Canadian *In Situ* Oil Sands Company

LARICINA
ENERGY LTD.

Laricina is advancing *in situ* technology and innovation, through its forward thinking approach and practices.

Headquartered in Calgary, Alberta, our operations are located in the Athabasca oil sands, the world's largest crude bitumen deposits.

An opportunity....unlike any other

Start something

BIG

Our operations are currently expanding. We are seeking exceptional individuals who want to work with us on our current projects and help us build new ones. We foster and encourage an entrepreneurial and innovative approach to projects. The best ideas are pursued whole-heartedly, with full support from senior leadership.

Investing in the community

As a resource developer Laricina is constantly reminded of the opportunities, wealth and quality of life that our activities impact in the communities in which we operate.

Our mandate is to work with community leaders and build strong and lasting relationships in order to facilitate and support growing opportunities.

We practice and facilitate open dialogue through community engagement and consultation with Aboriginal stakeholders and local organizations in order to advance community development and Laricina's operations.

Our approach

Laricina's operations are focused on pursuing less developed in situ resources that can lead to advancements in efficiency, cost and performance, as well as environmental improvements.

We like to think outside the box, but inside the lines. We generate, foster and execute ideas based on practicality and profitability. We focus on advancing and innovating SAGD technologies through new and improved extraction methods that surpass industry standards and pioneer the next steps in oil sands production.

**We are looking for leaders,
innovators and entrepreneurs that are
ready to think differently!**

Discover your potential

Our strength is rooted in our people. We don't just hire employees. We hire people with an entrepreneurial spirit who are value-driven, forward thinking and play an active role in the growth of our company.

We hire young talent and leading industry experts because we understand the value in having a strong and diverse team in a constantly evolving industry.

Career opportunities

Field

With both our Saleski and Germain projects in their expansion phases, we need various key talents such as operators with steam tickets, individuals in the trades and office professionals with solid work experience to help us build, grow and operate.

Office

Laricina is seeking enthusiastic and creative professionals who can help our Company grow and who can grow with our Company. We need experts in the oil sands field, business, geosciences, engineering and recent graduates who want a place to cultivate their career.

Students and graduates

Laricina participates in various career fairs and open house events during the year. We have opportunities for students and graduates to be our future innovators, leaders and entrepreneurs.
