

Laricina Energy Ltd. is a private company concentrating on capturing opportunities in the oil sands areas of Western Canada. Our Company is focused on creating value through developing a diverse portfolio of oil sands assets that leverage technology and market developments. Laricina offers the opportunity to join a growing, challenging and exciting work environment that has personal and career rewards for the entrepreneurial individual.

Since 2005, we have been in the business of creating value through developing a diverse portfolio of oil sands assets focused exclusively on in situ or underground bitumen deposits. Laricina offers strength in the oil sands with our experienced engineering, geological and research team. A career with Laricina is a career in innovation and growth.

Currently under construction, our Saleski steam-assisted gravity drainage (SAGD) Pilot is the first of our planned facilities and is located within the West Athabasca Oil Sands region, approximately 100 kilometres southwest of Fort McMurray, Alberta and 80 kilometres northeast of Wabasca, Alberta. We have a number of camp based field operating positions available, including:

Control Room Operators

As we continue to grow, we have an immediate need for additional Control Room Operators with demonstrated experience and training in the start-up, shutdown, process control, and operation of SAGD or equivalent high pressure industrial facilities.

You will be part of a team working a 12-hour shift schedule, contributing to high standards of safety, environmental protection and quality.

- A minimum of 3 years Thermal and/or heavy oil operations experience is preferred. Significant relevant experience will be considered.
- Operations of process units and plant facilities including steam generators, compressors, pumps and treaters would be an asset.
- Qualifications include a valid class 5 drivers license and a minimum of a 4th Class Power Engineering Certification.

All successful candidates will have strong communication skills, an ownership mindset and the ability to work within a 7 days in/out rotation schedule.
